THIS HAIR WASH has been prepared 1 by us for the last 20 years. Its sale is steadily increasing in India, the Straits and Japan. It possesses all the qualities of a Hair Oil or Pomade without their stickiness. It induces a healthy action of the scalp and nourishes the Hair. - Dandruff never appears whilst it is in use. It contains none but the best ingredients, and the greatest care is taken in the compounding. When the Hair falls off after fever or any other sickness, this Wash will surely prove of the greatest value.

From its great nourishing power on the follicles it may in time cause Hair to return to its natural color; it, however, does not contain a particle of any dyeing ingredient. Using it constantly will most certainly prevent the Hair falling. It is cleanly in use, the smallest quantity sufficing. It has no sediment, and therefore requires no shaking.

DIRECTIONS.

A small portion to be poured upon the Head

and to be rubbed into the roots of the Hair.

No Pomade required.

This been postponed on account of the Recep- is, we presume, a mistaken or incomplete officer was confirmed about this time last year. What the announcement really means, we suspect, is that General Halderman's post has been raised from the rank of Consulate to that of Consulate-General. Such a movement, we understand, was in antiqipation, and it is more than probable that this change has been carried into effect, and that the fact has been misunderstood or mixed up in transmission by telegraph to England across the Atlantic. Considering the ignorance shown even in Congress over the Consulates established throughout the world, this is not an unlikely occurrence; and if our surmise prove to be correct, we think the American residents in Bangkok and Siam will have reason to congratulate themselves upon the advancement of General Halderman thus indicated.

> any official secrets that may be tortured into an apparent triumph for the present Head of the Executive, it has been seen that he seeks a pen and a medium whereby he may make known the glad tidings. Either our contemporary or the 'Come missioner" has a grievance, if half the rumours in town be true. The public was informed one morning not so very long ago of a programme that had been carried out, and we were told "that this programme includes all that Sir John Hennessy has been seeking since he made his first denotices as to what is really going on, or rather as to what some folks desired should be going on, concerning Hongkong affairs. hoped the sea voyage might do something Petchefstroom, published to-day, throws some light upon the strange announcement of the 30th March, to the effect that the garrison had capitulated, that the British loss was 108 killed and wounded, and that the peace conditions had been signed. As the Boers had accepted the conditions o peace on the 19th March, this capitulation of a British Garrison has somewhat puzzled us until now. The explanation, that the Boers by their own admission trescherously delayed the news of the armistice and o the peace conditions, is a reminder of the character of these people which should b carefully noted and discreetly valued. Lake most political questions now-a-days, it i difficult to balance the arguments for and against the action of the English Government which culminated in the Transvaa conflict; but if, as Sir T. Shepstone alleges. the Boers were glad of annexation when in their extremity, their so-called patriotic re sistence to authority lately shown, regarded in the light of this piece of treachery a Petchefstroom, cannot be of a very high o pure description. A home paper happily hits off the Boerish character as an "ode compound of religion and savagery;" bu the accounts that have been published o their conduct towards the wounded, and this last instance of barbaric warfare imply that the savagery is rather more prominent than the religion in their com position. In a previous notice we aketche the circumstances under which the annext tion took place, and mentioned that the main reason which led to the step was th peril in which the peace of South Afric was placed by the then weak condition e the republic. The terms of the peace which has been concluded will be anxiously looke for, because upon these will depend th justification of the policy of Sir T. Shepston as well as that of the Government which suspected of having signed conditions at moment not too favourable for the prestic of English arms. The London Times appear to us to hit the mark in the followin

the quarrel, and had brought them seemingly within reach of a punishment well deserved, but of bad example and dangerous to those who had had no share in the original offence. What Sir Theophilus Shepstone sought to accomplish must be secured now. The relations between the Boers and the native races of the Transvaal and its neighbourhood must be so arranged that they shall not provoke the disorders have constantly attended them. Some guarantee must be given for thissome sufficient acknowledgement of the controlling power of England in any future disturbance that may arise. This done. there can be no difficulty about granting the Boers so large a measure of self-government that they will be independent in all but name. They will be left free to govern or misgovern themselves as they may please, but they must not be suffered to do wrong to others, least of all to those who have a claim upon the protection of the British If the Boer war could be settled on these terms without further fighting, we ask for nothing more. But they imply a very real subordination, and they must be secured by something more substantial than verbal promises, or than an understanding which the two parties will not interpret in the same way when the time comes for enforcing it.

as much pleased with the attention the Bombay Volunteers pay to rifle-shooting, and their efforts to become "first-rate marksmen," which, the General says, "in these days means first-rate soldiers:" he has offered a prize of Rs. 200 annually as long as he is connected with India, to be shot for by members of the corps.

been issued, stating that the Grand Duke Vladimir has been named Regent in case of the Emperor of Russia's death during his son's minority.

London, 28th March.—The latest Cape advices state that an engagement of an indecisive character has taken place between the Colonials and the Basutos, in which Colonel Carrington was severely wounded. . The Governor of Cape Colony has made a speech, in which he said that although the Basutos were defiant there were indications pointing to an early conclusion of peace.

REGARDING the change in the manner of the communication of official news to the press; the Statesman writes :-

We may at once admit that there is no reason why all that the Press Commissioner be done by a clerk in the Foreign Office under the eye of a fairly intelligent 'under-Secretary, and so the saving of Mr Lethbridge's salary may be regarded as a clear gain to the country, and will pay the interest of about two millions of the public But the Press Commissionership might, we think, have made been an office of great public utility and well worth its cost; and we cannot, without a touch regret, see the final failure of a scheme in which at one time we took so keen an interest. We hope the new arrangement will work well. It will at least secure that a certain amount of information shall be distributed to the press generally, and the the run down to the Bass Rock a very heavy press will doubtless be thankful for the sea was encountered, and the vessel's seasmallest of mercies. One thing that we going qualities were thoroughly tested, to never could understand is, why the Press | the satisfaction of all concerned. The Pe- | dealer's shop in East Street. Commissionership should always have been regarded as so intimately connected with the Foreign Office. The Government of India seems to think that it is only Foreign Office news that the public care for.

THE following, which the British Medical Journal calls a "double-edged criticism is from the New York Medical Record :-

Mile. Bernhardt's deaths are remarkable. artistic, and effective. We must confess to having seen few in real life that moved us so deeply. The death-struggles, we may say, were remarkably life-like in a certain sense. We have never seen their equal in real death. We can recommend the profession to study the phenomena of the trionic death as shown in Mile. Bernhardt. for a physician may practice all his life and never see anything like them,

THERE is living at the house of Captain Mans, of Milbridge, Me., a girl about 9 years of age, whose history is remarkable. Within the present year an American vessel 'called at a small island in the Pacific Ocean to procure water. The island was inhabited by cannibals. They brought this little girl to sell for the Cantain's dinner. offering to prepare her for cooking if he would buy. The Captain told them he would buy her, but he chose to kill his own meat. She was bought, and the Captain afterwards meeting Captain Mans, gave her to him. Her complexion is not unlike the North American Indian, but the shape of her face is different, being quite round, forehead broad, eyes large, mouth large, with large teeth pointing somewhat outward, which has a tendency to cause her lips to appear thick, chin very small and retreating. She is of good form, with very small hands and feet. She still believes she will be killed and eaten, and when strangers enter the house, she clings to Mrs Mans, and begs of her not to let them have is being prepared for sea at Chatham, is work on this subject, says, with reference her.—Alta Cilifornia.

We regret to have to announce the death of Mr Richard James Gilman, at Bath, at the age of sixty-nine years. Mr Gilman was one of the earliest settlers in China, and will be temembered by those whose memory carries them back to the years of 1840 to 1850. Mr Pye's death will be a loss, not only to the community to which he belonged, but also to Hongkong, where his gentlemanly bearing and genial manner were greatly appreciated.

If it were not the lesson of life and the teaching of history that what currently transpires, what is uttered, written, or published in any form, is in great measure like the outer crust of things that often conceals their real nature, and that the more important or precious the secret the more impenetrably it is enshrouded from observation, as the pearl-like fruit of the mangosteen is protected from both the curious and the greedy; we might say that the present time is rife with reasons for reading between the lines, not only of Reuter's brief telegrams. but of the fuller text of mail matter and even of speeches in Parliament. posed the same amount as fixed by the Magistrate before the inquiry, viz: \$15,000. Mr Bond objected to allowing bail at all on the ground that as the prisoner had clearly shown such a disposition to abscond it was possible he would abscond upon his bail, and therefore in the public interest and for the public protection he was opposed to bail being allowed.

The Magistrate thought the Court should be the judge of the propriety or otherwise of allowing bail, and he thought if the prisoner had some one interested in the sum of \$15,000 to look after him, he would not be likely to get away so easily as when he had no one to do so.

After some further discussion, the Magis trate decided to allow bail in \$20,000. Mr Vaughan applied for the restoration to the prisoner of certain private papers, such as the Life Insurance policies, etc. etc., of which no use had been made in evidence: but these being found to be marked Exhibit M, the application was re

1. The conviction was bad because one penalty only was awarded for two offences (He was charged 1st with wilful Breach of duty, 2nd with wilful Neglect of duty.) 2. The conviction was bad because there

was no evidence of the ship being a British ship, and therefore the Magistrate had no jurisdiction, and furthermore the conviction thereby did not conform with the facts of the case as proved 3. The conviction was bad because such

The pass public affairs are coming to in Hongkong is positively humiliating. The "block" in the Supreme Court was the news of yesterday; to-day it is the "block" at the Central School. There is not, perhaps, in any colony an institution of which the residents are more justly proud than are those in Hongkong of their Central School. With a devotion and self-denial almost incredible, an able educationist gave the best years of his life to its consolidation cisively as to Chinese willingness to come and development. CHINA AND THE UNITED STATES Commissioner Swift has been interviewed by a reporter of the San Francisco Chronicle concerning the negotiations and provisions of the new Chinese treaties, and is reported to have spoken as follows:---"When I was appointed and left for Chi-

as if all the hard work of nearly twenty at the commencement of affairs, as our venrs is to be thrown to the winds. Sir despatches to Washington would have Pope Hennessy has, unfortunately, shown had they been more fully telegraphed it in hand, instead of letting well to you from Washington. First, Pao Chun alone. Like many of his Excellency's and Li Hung Chow sent us a paper in which schemes, this referring to the Central School they said, in substance, that it was only business has been a failure. When the staff the Irish rabble that wanted Chinese imof the school were fully occupied in the migration stopped, and that the better class work of examination, one of their number of Americans thought mostly the other way. was sent to assist Dr. Eitel, who was at that We at once took ground to assert the digtime labouring at his Herculean and mani- nity of the commission and country, refold duties connected with his honourable buked them for making any distinction bepost of general factorum to the Governor. tween American citizens, and they at orce Aid was required by Dr. Eitel, and hence threw the responsibility upon a former decision of the Magistrate of Penang, on the School. This curtailing the staff at a time to the Chinese Commissioners a protocol, a when they were required was a grave in- draft of what we wanted in treaty form justice. Surely there was to be found some It contained only a single section, but in other person for the office. Subsequently, that we substantially put our claims. It provided that the United States should, in lency appointed a board to take up the work its discretion and in its own way and suspend the immigration of Chinese labourers, as well as their residence in this were in a state of suppressed mutiny. This | country—thus, not only regulating their Governor Hennessy, but the Hongkong the next conference we were gently perplexed by receiving from them a complete draft of the treaty in form, containing a number of provisions which it was utterly impossible to accept. China demanded for instance, that we should allow mechanics to come, and only to entirely restrict the coming of those whom we call in America common or unskilled labourers. This was impossible, and we told him so, we demandunskilled. After many days this was yielded by the Chinese. They also asked that merchants and so forth and their 'emclovés' may come. This was not admisbecause, under this pretext, they conferences, was cut down to their body and household servants. Then they wanted come, but that only American citizens should be prohibited from employing them. it following, of course, that foreigners and the Chinese themselves could employ them at will and to what extent they pleased. Naturally this could not be entertained. and was left out altogether. Then they had a section which provided that before any regulation concerning Chinese immigration should take effect that it must first be submitted to and approved by the Peking authorities. This they did not give up until we again expressed the determination to return home empty-handed. The section. however, containing the provision was not stricken out, but stands in a modified form as section 4, and provides so as to require the regulations after enactment to be communicated to the Chinese Government, and allowing them to complain through the Foreign Office if they do not approve of what is set down. In other words, they have a treaty right to grumble. It is said that the treaty tends to confer the right of naturalisation upon Chinese, but it does no such thing. That question was thoroughly considered been provided for, or no treaty made had we not completely understood that nothing of the sort was provided for. You have only to understand the principle underlying the naturalisation laws to see that there is nothing in the point. Naturalisation is nowhere a treaty right. The most favoured nation has no such treaty with us: even Germans and the English have no such right; nor have Americans in either Germany or England. Indeed, in England foreigners cannot be naturalised so as to hold office without a special act of Parliament for each individual case. France allows of naturalisation as the reward for some distinguished public service—such. objected. Still when the person who tries | Wade was again his lordship's secretary for | for instance, as the establishment of a new industry. Populated countries usually have no general naturalisation laws. Naturalisation is kept by every country as a reserved right to exercise or not at its will. The objection has been raised that the word 'labourer' in the treaty will admit of dangerous latitude; but there is no such possibility, and for three seasons—First, the construction placed by Congress upon the word will be decisive; second, the Chinese Commissioners conceded the point by leaving out the word 'machanic,' upon which they had laid much atress; third, there are only two kinds of labourers—skilled and unskilled—and the word 'labourer' covers both. To call a hod-carrier a labourer and not to call a weaver one is to use the word in its narrowest sense. The likelihood is that Congress will stretch it to include even physicians and those who labour with their brains. Why, the Chinese Commissioners raised the issue, and suggested that the term would include even consuls. It has been said by General Butler that we cannot stop the Chinese from coming via Hongkong without a treaty with Great Britain: but there is nothing in that. True, the immigrants come from a British port as a port of departure, but they are Chinese subjects, and not those of Great Britain. Their protection, therefore, comes from treaties made with China and now Great Britain. So far as the ship transporting them is concerned it carries them simply as a matter of commerce. The British ship has the right from treaties between Great Britain and the United States to engage in lawful commerce and

I love to see them sail along. In grandest state, so great, so strong To hide the sun quite out of sight, Then melt away in light.

I love to see them gath'ring dark. With gloom the sky o'ercast, while, hark Where lightnings keenest blade doth flash They thund'ring roar and crash.

And then, at times, they hang like folds Of curtains thick; and chilling cold, They blot the hills from off the main, And drop in pearls of rain.

The silv'ry moon doth love them best: For, nestling soft, in peaceful rest, She lies at ease; and turns, with light. Their darkest thoughts to bright.

And now, like bridal veil, her face, Half-hid, with filmy forms, like lace, That serve to heighten all her grace, While she her course doth trace.

I love to see them flush with joy, As trembling Dawn, with smiles so coy, First leads the way, for monarch Day, And Night fast hies away.

While all the brightest shades of sky, First kiss them bright, then die. And, oh! to riso to glorious heights, And dip my pen in all their lights,

But still I love to see them best,

HEALTH, STRENGTH, & ENERGY.

Trade Mark-PHOSPHODYNE. DISCOVERED AND SO NAMED, A.D. 1862,

BY R. D. LALOR, M. D. DR. LALOR'S PHOSPHODYNE is a Pure Solution of PHOSPHOROUS in combination with the Vegetable Alkaloids Quinim, Cypripedin, Xanthoxylin, &c., prepared by a Chemical process known only to DR. LALOR, producing a remarkably Elegant and Pleasant Tasted Preparation, equal to the best Wines, Prefectly free from Strychnia and all other Dangerously Active Drugs; superseding the numerous objectionable forms of Phosphorous Pills, Pilnles, Oils, and other Nauseous Mixtures with which the Market has been flooded since the Phosphoric Treatment of Disease was first made Public by DR. R. D. LALOR, in 1862.

To Residents in India, China, and the Colonies, it will prove invaluable as a RELIABLE Liver Tonic and a Vitalizing Restorative.

This Phosphatic combination, the Wonder of Modern Chemistry, is pronounced by the most eminent members of the Medical profession to be unequalled for its power in replenishing and elaborating the Vitality of the Body; by its supplying all the essential constituents of the BLOOD, BRAIN, and NERVE SUBSTANCE; and for developing all the Powers and Functions of the system to the highest degree; by its being agreeable to the palate, and innocent in its action. While rotaining its wonderful properties, it acts as a Specific, surpassing all the known "THERAPEUTIC AGENTS of the PRESENT AGE, for the speedy and PERMANENT CURE of all derangements of the Nervous and Blood Systems, Nervous Prostration, General Debility, Mental and Physical Depression, Incapacity for Study or Business, Noises in the Head and Ears, Loss of Energy and Appetite, Indigestion and Liver Complaints, Flatuleuce, Norvous Fancies, Hypochondria, Nervous Debility in all its Stages, Loss of Memory, Softening of the Brain, Paralysis, Affections of the Spinal Column, Lumbago, Sciatica, Affections of the Kidneys, Bladder, Urinary Deposits, &c., Ague, Spasms, Asthma, Consumption, Chronic Bronchitis, Scrofula and Skin Diseases, Rickets (in children), Wasting or Withering of the Muscles, Impaired Nutrition, Impoverished Blood, Premature Decline, and all morbid conditions of the system, dependent upon the deficiency of THE VITAL FORCES, whether arising from Climate, Brain Fag, or whatever

DR. LALOR'S PHOSPHODYNE being a natural RESTORATIVE, its Energising Effects are not followed by corresponding re-action; but are PERMANENT; and are frequently shown from the tions of the body, without creating any of first day of its administration by a remarkable increase of Nervous Power, with a feeling of of opium. Old and young may take it at all Vigour, Strength, and Comfort, to which the patient has long been unaccustomed. DR. good effects and wonderful cures, while LALOR'S PHOSPHODYNE gives back to the Human structure in a suitable form the Phosphoric or Lively Animating element of life which has been wasted, and exerts an important influence directly on the BRAIN, SPINAL MARROW, AND NERVOUS SYSTEM, of a Nutritive, Tonic, and Invigorating character; thereby checking all Wasting of the Vital Fluid, and the more Exhausting Processes of Life, maintaining that Bnoyant Energy of the Brain and Muscular System which renders the MIND CHEERSUL, HAPPY, BRILLIANT, and ENERGETIC; entirely overcoming that Dull, Inactive and Sluggish disposition which many persons experience in all their actions. A Marvellous Restorative for Brain Toilers, Clergymen, Business Men, and all who are engaged in the Competitive Strug-

PHOSPHODYNE, the Antidote for Climatic The Remedial properties of DR. LALOR'S PHOSPHODYNE have spread its Mame throughout every Nation and Country in the World, the natural outcome of which is. that the sale has now become enormous in India, China, Africa, and other Hot Climates. This increased demand is attributable to the fact of its possessing in the most perfectly assimilable form the essential Vitalising properties of PHOSPHORUS, which reanimates the Exhansted functions of Life when impaired by Heat or other causes. \A very large number of Testimonials from all parts of the World freely offered from Distinguished Families, Private Persons, Military, Naval, Scientific and Profescional Men who are well known, speak of its marvellous powers in Nervous Debility, WANT OF STAMINA, FEVERS, MALARIOUS DIS-EASES, and as a LIVER TONIC.

PUBLIC NOTICE AND WARNING .- To Medicine Vendors and the Public in Great Britain, India, China, and the Colonies .- DR. LALOR'S PHOSPHODYNE is the only Medicine bearing the name PHOSPHODYNE that has the Sanction of the British Government. and for which Her Majesty's Registrar of "Trade Marks has granted Certificates to DR. LALOR ONLY. Therefore DR. LALOR'S is the only Legitimate and Genuine PHOSPHODYNE.-BEWARE of Mean and Actionable Fraudulent Imitations of my Trade Mark, Phosphodyne with Fictitious addresses that may emenate from Australia or America.

CAUTION ... The Name DR. LALOR'S PHOSPHODYER is blown in the glass of each bottle, and the denuine Phosphodyne is manu-factured at and is obtainable only direct from Dr. Laler's Laboratory, London, Eugland. WHOLESALE and EXPORT HOUSES are specially requested to NOTE this, and to pass their Indents through the London Houses, or English Firms of known respectability ONLY, to ensure their being supplied with the Special Medicines prepared solely by Dr. Robert D. DR. J. COLLIS BROWNE'S

CHLORODYNE (Ex Army Med. Staff) IS THE ORIGINAL AND ONLY

GENUINE. CAUTION. - Vice-Chancellor Sir W. P. Wood stated that Dr. Collis Browne was indoubtedly the Inventor of Chlorodyne. that the story of the Defendant, Freeman, being the Inventor was deliberately untrue; which he regretted had been sworn to. Eminent Hospital Physicians of London stated that Dr. J. Collis Browns was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's. - See Times, July 12, 1864. The public, therefore, are cautioned

against using any other than DR. J. COLLIS BROWNE'S CHLORODYNE.

REMEDIAL USES AND ACTION. This invaluable remedy produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secrethose unpleasant results attending the use hours and times when requisite. Thousands of persons testify to its marvellous medical men extol its virtues most exten-

CHLORODYNE is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for coughs, consumption, bronchitis, asthma. UHLORODYNE effectually checks and arrests those too often fatal diseasesdiphtheria, fever, croup, ague.

Unloropyne acts like a charn in diata hor, and is the only specific in cholera and dysentery. CHLORODYNE effectually outs short all attacks of e, i'epsy, hysteria, palpitations

CHLORODYNE is the only pulliative in neuralgia, rheumatism, gout, cancer, tooth ache, meningitis, &c.

EXTRACTS FROM MEDICAL OPINIONS. The Right Hon. Earl Russell communi cated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.-

See Lancet, Dec. 31, 1864. From A. Montgomery, Esq., late Inspector of Hospitals, Bombay :- "Chlorodyne is a most vi rable remedy in Neuralgia. Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when other

remedies had failed."

Dr. Lowe, Medical Missionary in India, reports (December 1865) that in nearly every case of Cholera in which Dr. J. Collis BROWNE'S CHLORODYNE was administered, the patient recovered. Extract from the General Board of

Health, London, as to its efficacy in Cholera -"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases.

See leading article, Pharmaceutical Joyr nal, August I. 1869, which states that Dr J. Collis Browne was the inventor of Chloredyne; that it is always right to use his preparation when Chlorodyne is ordered. CAUTION .- None genuine without the ords "Dr. J. Collis Browns" on Government Stamp. Overwhelming medical testimony accompanies each bottle.

THE CHINA REVIEWS

THE widely-expressed regret at the discontinuance of Notes & Queries on China and Japan, has induced the publishers of this journal to issue a publication similar in object and style, but slightly modified in certain details.

THE CHINA REVIEW, or Notes and Queries on the Far East, is issued at intervals of two months, each number containing about 60 octave pages, occasionally illustrated with lithographs, photographs, woodcuts, &c., should the papers published demand, and the circulation justify, such 4. From

extra matter.

The subscription is fixed at \$6.50 postage paid, per annum, payable by non-residents in Hongkong half-yearly in advance.

The publication includes papers original and selected upon the Arts and Sciences, Ethnology, Folklore, Geography, History, Literature, Mythology, Manners and Customs, Natural History, Religion, &c., &c., of China, Japan, Mongolia, Tibot, the Eastern Archipelego and the "Far East," generally. A more detailed list of subjects upon which contributions are especially invited is incorporated with each number. Original contributions in Chinese, Latin, French, German, Spanish, Italian or Portuguese, are admissible. Endeavours are made to present a resume in each are made to present a resume in each number of the contents of the most recent works bearing on Chinese matters. Great attention is also paid to the Roview

Notes and Replies are classified together as "Notes" (head references being given, when furnished, to previous Notes or Queries), as are also those queries which though asking for information, furnish new or unpublished details concerning the matter in hand. It is desirable to make the Queries proper as brief and as much to the point as possible.

The China Review for July and August, 1875, is at hand. It says that forty-two essays were sent in to compete for the best paper on the advantages of Christianity for the development of a State. All our learned societies should subscribe to this scholarly and enterprising Review. It is a sixty paged, bi-monthly, repertory of what scholars are ascertaining about China. The lecture on Chinese Poetry in this volume is alone worth the price of the Review. Address China Review, Hongkong.-Northern

Christian Advocate (U.S.) . Trupner's Oriental Record contains the following notice of the China Review :- "This is the title of a publication, the first number of which has lately reached us from Hongkong, where it has been set on foot as in some respects a continuation of Notes and Queries on China and Japan, the extinction of which useful serial a year or two ago has. been much regretted in Europe as well as In Chins. The present publication judging by the number now before us, is intended to occupy a position, as regards China and the neighbouring countries, somewhat similar to that which has been filled in India by the Calcutta Review. The great degree of attention that has been bestowed of late years upon the investigation of Chinese literature, antiquities, and social developments, to say nothing of linguistic studies, has led to the accumulation of important stores of information, rendering some such channel of publicity as is now provided extremely desirable; and contributions of much interest may fairly be looked for from the members of the foreign consular services, the Chinese Customs' corps, and the missionary body, among whom a high degree of Chinese scholarship is now assiduously cultivated, and who are severally represented in the first number of the *Heview* by papers highly creditable to their respective authors. In a paper on Dr. Legge's She King, by the Rev. E. J. Eitel, to which the place of honour is deservedly given, an excellent summary is presented of the chronological Hardwick Fopp Brit. str. 715 April 16 C. M. S. N. Co. problems and arguments involved in connexion with this important work. Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the career of the Chinese poet statesman of the eleventh century, Su Tung-p'o, by Mr. E. C. Bowra, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that "Notes" and "Queries" are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Chinese subjects may evoke a similar degree of literary zeal to that which was displayed during the lifetime of its predecessor in the field, and that the China Review. may receive the support necessary to insure its continuance. The publication is intended to appear every two months, and will form a substantial octavo magazine.

This pape is now issued day. The subscription is fixed at Four Dollars per annum delivered in Hong-kong, or Seven Dollars Fifty Cents insluding postage to Coast ports. It is the first Chinese Newspaper ever issued under purely native direction. The chief support of the paper is of course

derived from the native community, amongst whom also are to be found the guarantors and securities necessary to place it on a business and legal footing.

The projectors, basing their estimates upon the most reliable information from the various Ports in China and Japan,—from Australia, California, Singapore, Penang, Saigon, and other places frequented by the Chinese, - consider themselves

justified in guaranteeing an ultimate circulation of between 3,000 and 4,000 copies. The advantages offered to adver-tisers are therefore unusually great, and the foreign community generally will find it to their interest to avail themselves of

The field open to a paper of this description—conducted by native efforts, but progressive and anti-obstructive in tone—in almost limitless. It on the one hand commands Chinese belief and interest while on the other deserves every aid that can be given to it by foreigners. Like English journals it contains Editorials with Local, Shipping, and Commercial News and Advertisements.

Subscription orders for either of the Subscription orders for either of the
